README

Cybersecurity Awareness Chatbot - Part 1

Overview

This project implements a basic console-based chatbot designed to raise awareness about cybersecurity. It provides a friendly greeting, interacts with the user, offers predefined responses to common cybersecurity questions, and includes basic input validation. The chatbot's user interface is enhanced with multimedia elements such as a voice greeting, an ASCII image, and coloured text formatting.

Learning Objectives

By completing this part of the assignment, i am now able to:

- Write a console program that requires user input in C#.
- Apply string manipulation techniques to solve programming problems.
